## PART 1: THE BASICS

### CHAPTER 1

#### General Pharmacologic Principles 3

- 1.1 Basic Terms 4
- 1.2 Drug Development 5
- 1.3 Herbal Supplements (Nutraceuticals) 6
- 1.4 Drug Information Sources 7
- 1.5 Interpreting Drug Information 7
  - 1.5a Drug Names 8
  - 1.5b Clinical Pharmacology 9
  - 1.5c Indications and Usage 9
  - 1.5d Contraindications 10
  - 1.5e Drug Interactions 11
  - 1.5f Adverse Drug Reactions 12
  - 1.5g Dosage and Administration 15
- 1.6 Routes of Administration 15
  - 1.6a Enteral Routes 17
  - 1.6b Parenteral Routes 17
  - 1.6c Other Routes 17
- 1.7 Pharmacokinetics 19
  - 1.7a Absorption 19
  - 1.7b Distribution 21
  - 1.7c Metabolism 22
  - 1.7d Elimination 23
- 1.8 Pharmacodynamics 24
  - 1.8a Selectivity 24
  - 1.8b Lock and Key Receptor Theory 25

- 1.8c Racemic Mixtures 26
- 1.8d Agonists versus Antagonists 26
- 1.8e Potency 26
- 1.8f Tolerance 27
- 1.8g Half-Life 28
- 1.8h Poisoning and Toxicity 29

1.9 Pharmacogenomics 29

1.10 Prescription Orders 30

1.11 Commonsense Rules 32

Summary 33

Review Questions 33

### CHAPTER 2

#### The Metric System and Drug Dosage Calculations 35

- 2.1 Exponential Powers of 10 36
  - 2.1a Exponents 36
- 2.2 Systems of Measurement 38
  - 2.2a United States Customary System 38
  - 2.2b The Metric System 38
  - 2.2c Example Calculation 1 39
  - 2.2d Example Calculation 2 39
  - 2.2e Conversion of Units 41
  - 2.2f Example Calculation 3 41
  - 2.2g Example Calculation 4 42
  - 2.2h Factor-Label Method to Convert between Systems 42
  - 2.2i Example Calculation 5 42
  - 2.2j Example Calculation 6 42

2.3	Drug Dosage Calculations	43
2.3a	Solutions	43
2.3b	Percentage Solutions	44
2.3c	Setting Up Proportions	45
2.3d	Example Calculation 7	45
2.3e	Example Calculation 8	46
2.3f	Example Calculation 9	46
2.3g	Ratio Solutions	47
2.3h	Drug Orders in Drops	48
<b>Summary</b>		49
<b>Review Questions</b>		49

## CHAPTER 3

### Pharmacology of the Autonomic Nervous System

51

3.1	Nervous System Divisions	52
3.1a	PNS Divisions	53
3.2	Nervous System Conduction	57
3.2a	Types and Location of Neurotransmitters	57
3.2b	Receptors	59
3.2c	Receptor Classification	61
3.3	ANS Drug Terminology	62
3.3a	Direct- and Indirect-Acting Agents	64
3.3b	Parasympathomimetics	64
3.3c	Parasympatholytics	65
3.3d	Sympathomimetics	66
3.3e	Sympatholytics	69
<b>Summary</b>		70
<b>Review Questions</b>		70

## CHAPTER 4

### Medicated Aerosol Treatments

73

4.1	Basic Concepts of Medicated Aerosols	74
4.1a	What Is Aerosol Therapy?	74
4.1b	Advantages and Disadvantages	75
4.1c	Technical Background	76
4.1d	Aerosol Size Matters	77
4.1e	Breathing Pattern	78
4.1f	Types of Aerosolized Drugs	79

4.2	Aerosol Delivery Devices	80
4.2a	Metered-Dose Inhaler	80
4.2b	Small-Volume Nebulizer	84
4.2c	Other Nebulizer Designs	84
4.2d	Continuous Bronchodilator Therapy	85
4.2e	Dry Powder Inhaler	86
4.2f	Choosing the Appropriate Delivery Device	87
4.2g	Aerosol Delivery in Intubated Patients	88

4.3	The Future	90
-----	------------	----

<b>Summary</b>		91
----------------	--	----

<b>Review Questions</b>		91
-------------------------	--	----

<b>Case Study 4-1:</b> Mr. Blue		92
---------------------------------	--	----

## PART 2: THE SPECIFIC DRUG CATEGORIES

## CHAPTER 5

### Bronchodilators

95

5.1	Airway Anatomy and Physiology	96
5.1a	Bronchoconstriction versus Bronchospasm	97
5.2	Neurological Control of Bronchial Smooth Muscle	99
5.2a	Sympathetic Nervous System	99
5.2b	Parasympathetic Nervous System	99
5.2c	Chemical Mediators of Neural Transmission	100
5.2d	Sympathetic Nervous System Receptors	102
5.2e	The Sympathetic Nervous System in the Lung	102
5.3	Bronchodilators	103
5.3a	Sympathomimetic (Adrenergic) Bronchodilators	105
5.3b	Mechanism of Action	105
5.4	Development of the $\beta$ -Agonists	106
5.4a	Catecholamines	108
5.4b	Resorcinols	108
5.4c	Saligenins	109
5.4d	Side Effects of $\beta$ -Agonists	114

<p>5.4e Classification by Duration of Action 116</p> <p><b>5.5 Anticholinergic (Parasympatholytic) Bronchodilators 118</b></p> <p>5.5a Mechanism of Action 119</p> <p>5.5b Atropine Sulfate 120</p> <p>5.5c Ipratropium Bromide (Atrovent®) 121</p> <p>5.5d Tiotropium Bromide (Spiriva®) 122</p> <p>5.5e Monitoring Outcomes of Inhaled Bronchodilator Therapy 125</p> <p><b>5.6 Methylxanthines 127</b></p> <p>5.6a Mechanism of Action 127</p> <p>5.6b Nonbronchodilating Effects of Theophylline 127</p> <p><b>Summary 126</b></p> <p><b>Review Questions 126</b></p> <p><b>Case Study 5–1:</b> A 66-year-old male 128</p> <p><b>Case Study 5–2:</b> A 9-year-old boy 128</p> <p><b>Case Study 5–3:</b> A patient with COPD 129</p>	<p><b>6.4d Types of Exogenous Surfactants 150</b></p> <p>6.4e Therapeutic Approaches 150</p> <p>6.4f Representative Drugs 151</p> <p>6.4g General Techniques of Surfactant Administration 151</p> <p>6.4h Adverse Reactions 152</p> <p>6.4i Surfactant Administration in Adult Patients 154</p> <p><b>Summary 155</b></p> <p><b>Review Questions 155</b></p> <p><b>Case Study 6–1:</b> A COPD patient 157</p> <p><b>Case Study 6–2:</b> A baby boy 157</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## CHAPTER 6

### Mucokinetics and Surfactants 131

<p><b>6.1 The Mucociliary System 132</b></p> <p>6.1a Anatomy and Physiology 132</p> <p>6.1b Structure and Composition of Mucus 133</p> <p><b>6.2 Bland Aerosols 137</b></p> <p>6.2a Definitions 137</p> <p>6.2b Delivery Methods 137</p> <p>6.2c Bland Solutions 139</p> <p><b>6.3 Mucolytics 141</b></p> <p>6.3a Definition 141</p> <p>6.3b Expectorants 144</p> <p>6.3c Antitussives/Cough Suppressants 144</p> <p>6.3d Conclusion 145</p> <p><b>6.4 Surface-Active Agents 145</b></p> <p>6.4a Alveolar Physiology and Surfactant Synthesis 145</p> <p>6.4b Surfactant Function 147</p> <p>6.4c Indications for Surfactant Replacement Therapy 150</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## CHAPTER 7

### Anti-inflammatory and Antiasthmatic Agents 159

<p><b>7.1 The Inflammatory Process 160</b></p> <p>7.1a The Immune Response 160</p> <p>7.1b Mast Cell Chemical Mediator Release 161</p> <p>7.1c Types of Asthma 163</p> <p>7.1d Phases of the Inflammatory Response 163</p> <p><b>7.2 Corticosteroids 165</b></p> <p>7.2a Corticosteroid Physiology 165</p> <p>7.2b Hypothalamic-Pituitary-Adrenal Axis 167</p> <p>7.2c Corticosteroid Mechanism of Action 168</p> <p>7.2d Corticosteroid Use in Airway Remodeling 169</p> <p>7.2e Adverse Effects of Corticosteroids 169</p> <p>7.2f Oral and Parenteral Corticosteroid Administration 170</p> <p>7.2g Inhaled Corticosteroids 170</p> <p>7.2h Benefits of Daily Corticosteroid Use 173</p> <p>7.2i Steroid Dependency 175</p> <p><b>7.3 Antiasthmatics 175</b></p> <p>7.3a Cromolyn Sodium 175</p> <p>7.3b Dosage Forms 176</p> <p>7.3c Side Effects 176</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

7.4	Prostaglandins 176	8.3c	Antivirals to Treat Acquired Immunodeficiency Syndrome (AIDS) 207
7.4a	Physiology 176		
7.5	Leukotriene Modifiers 177	8.4	Antifungals 208
7.5a	Physiology 177	<b>Summary</b>	210
7.6	Antiasthmatic Monoclonal Antibody 178	<b>Review Questions</b>	210
