## Chapter 1

### *Psychology as a Science* 1

#### 1.1 What Is Psychology? 3

- 1.1a Psychology Is the Scientific Study of Mental Processes and Behavior 3
- 1.1b Early Pioneers Established Paths for Later Discoveries 3
- 1.1c Women and Ethnic Minorities Faced Discrimination as Pioneers in Psychology 5

#### 1.2 Contemporary Perspectives and Areas of Specialization 6

- 1.2a The Psychoanalytic and Behaviorist Perspectives Still Influence Theory and Research 7
- 1.2b Humanistic Psychology and Positive Psychology Highlight Personal Growth 7
- 1.2c Cognitive Psychology Focuses on How the Mind Organizes and Interprets Experiences 8
- 1.2d The Neuroscience Perspective Focuses on the Nervous System 8
- 1.2e Evolutionary Psychology Studies How Behavior Is Shaped by Natural Selection 9
- 1.2f The Sociocultural Perspective Studies How Behavior Is Shaped by Social and Cultural Forces 11
- 1.2g Psychology's Subfields Tend to Have Either a Research or Application Emphasis 13

#### 1.3 Scientific Methods in Psychology 15

- 1.3a Scientific Methods Minimize Error and Lead to Dependable Generalizations 15
- 1.3b The Research Process Unfolds in a Series of Stages 16

- 1.3c Description Is the Goal of Observational Research 22
- 1.3d Correlational Research Is Used to Analyze the Nature of the Relationship Between Variables 24
- 1.3e Experimental Research Determines Cause-Effect Relationships 28
- 1.3f There Are No "Final Truths" in Science 30

*Psychological Applications: How Can You Develop Critical Thinking Skills?—33*

## Chapter 2

### *Neurological and Genetic Bases of Behavior* 39

#### 2.1 The Neuron 41

- 2.1a Neurons Are the Nervous System's Building Blocks 41
- 2.1b A Neuron Consists of a Soma, Dendrites, and an Axon 41
- 2.1c A Neuron Is in Either a Resting or a Firing State 43
- 2.1d Neurons Communicate with One Another by Releasing Chemicals 45

#### 2.2 Neural and Hormonal Systems 49

- 2.2a The Peripheral Nervous System Connects the Brain and Spinal Cord with Body Organs and Tissues 49
- 2.2b The Spinal Cord Connects the Peripheral Nervous System to the Brain 50
- 2.2c The Endocrine System Communicates by Secreting Hormones 52

## 2.3 The Brain 55

- 2.3a Modern Technology Measures the Brain's Electrical Activity, Structure, Blood Flow, and Chemistry 55
- 2.3b Three Major Brain Regions Are the Hindbrain, Midbrain, and Forebrain 58
- 2.3c The Cerebral Cortex Is the Crowning Achievement of Human Evolution 62
- 2.3d The Cerebral Cortex Consists of Specialized Regions, or Lobes 64
- 2.3e The Right and Left Cerebral Hemispheres Function Differently 66
- 2.3f Left-Brain and Right-Brain Descriptors of People Are Too Simplistic 69
- 2.3g The Brain Can Alter Its Neural Connections 71

## 2.4 Genetic Influences on Behavior 74

- 2.4a The Basic Biochemical Unit of Inheritance Is the Gene 74
- 2.4b Both Heredity and Environment Can Influence Physical and Behavioral Traits 76
- 2.4c Molecular Genetics Seeks to Identify Specific Genes That Influence Behavior 77
- 2.4d Controversies Surround Genetic Explanations of Certain Sex and Race Differences 80

*Psychological Applications: If You Are Left-Handed, Is Your Brain Organized Differently from That of a Right-Hander?—84*

# Chapter 3

## Human Development 91

### 3.1 Physical and Prenatal Development 92

- 3.1a Prenatal Development Occurs in Three Stages 92
- 3.1b The Fetus Can Be Harmed by Parental and Environmental Factors 94

- 3.1c Neurons in an Infant's Brain Compete for Survival 96
- 3.1d Physical Growth and Motor Development Occur Hand in Hand 97

### 3.2 Social Development 102

- 3.2a Attachment Is a Basic Need 102
- 3.2b Parental Responsiveness, Initial Temperament, and Culture Shape Attachment Style 104
- 3.2c Children Can Handle Parental Separation under Certain Conditions 106
- 3.2d Self-Concept Is the Primary Social Achievement of Childhood 107
- 3.2e Children Learn the "Right Way" to Think about Gender 112
- 3.2f Erikson Developed a Stage Model of Social Development 114

### 3.3 Cognitive Development 117

- 3.3a Piaget's Theory of Cognitive Development Has Four Distinct Stages 117
- 3.3b Some of Piaget's Conclusions about Children's Mental Capabilities Are Incorrect 122
- 3.3c Vygotsky's Theory of Cognitive Development Stresses Instruction and Guidance 122
- 3.3d There Are Age-Related Differences in How Information Is Organized and Manipulated 124
- 3.3e Children Differ in Their Ability to Exercise Self-Control 124

### 3.4 Moral Development 126

- 3.4a Kohlberg Identified Three Levels of Moral Development 126
- 3.4b Culture Shapes Moral Reasoning 128

### 3.5 Adolescence and Emerging Adulthood 129

- 3.5a Adolescence Is a Relatively Recent Life Stage 129
- 3.5b Puberty Signals Important Physical Changes and New Neural Wiring 130
- 3.5c Some Teenagers Experience Heightened Self-Consciousness 132
- 3.5d Ethnic Identity Development Can Short-Circuit Negative Effects of Prejudice 133
- 3.5e Emerging Adulthood Allows for the Exploration of Possibilities 134
- 3.5f There Are Some Gender Differences in Same-Sex Friendships 135

- 3.5g Cross-Sex Friendships Often Mirror Brother-Sister Relationships 136

### 3.6 Adulthood 138

- 3.6a Parenting and Job Responsibilities Can Conflict 138
- 3.6b Most Adults Do Not Experience a Midlife Crisis 140
- 3.6c The Body Begins a Slow Process of Physical Decline after Early Adulthood 141
- 3.6d Certain Intellectual Abilities Increase While Others Decrease as We Age 143
- 3.6e People Differ in How They Cope with Dying 145

*Psychological Applications: Using Effective Tutoring Strategies to Facilitate Cognitive Development—147*

Review **Questions** 149

## Chapter 4

### *Sensation and Perception* 153

#### 4.1 Basic Principles of Sensation 155

- 4.1a Our Sensory Receptors Convert Energy from Stimuli into Neural Impulses 156
- 4.1b Our Senses Vary in Their Sensitivity Thresholds 156
- 4.1c Our Sensory Receptors Adapt to Unchanging Stimuli 158

#### 4.2 Vision 159

- 4.2a We See Only a Narrow Band of Electromagnetic Radiation 159
- 4.2b Light Passes Through the Cornea, Pupil, and Lens Before Focusing on the Retina 160
- 4.2c Visual Information Is Transmitted to Both Brain Hemispheres 163
- 4.2d Colors Are Created in Our Visual System 165
- 4.2e Both Trichromatic Theory and Opponent-Process Theory Explain Color Vision 165

#### 4.3 Hearing 169

- 4.3a Sound Waves Are the Stimuli for Hearing 169
- 4.3b The Auditory System Consists of the Outer Ear, Middle Ear, and Inner Ear 171
- 4.3c Different Theories Explain Different Aspects of Pitch Perception 173
- 4.3d There Are Two General Types of Hearing Impairment 173

#### 4.4 Your Other Senses 175

- 4.4a Smell and Taste Represent “Far” and “Near” Chemical Senses 175
- 4.4b Touch Is Determined by the Skin Senses—Pressure, Temperature, and Pain 180
- 4.4c The Proprioceptive Senses Detect Body Movement and Location 183

#### 4.5 Perception 185

- 4.5a Sensory Stimuli Are Organized into a Gestalt 185
- 4.5b Perceptual Sets Shape Interpretations of Sensory Stimuli 191
- 4.5c Inattention Can Cause Us to Not Perceive a Highly Visible Object 192
- 4.5d Perceptual Illusions Represent a Misperception of Physical Reality 193
- 4.5e Certain Aspects of Perception Are Innate, and Others Are Learned 199
- 4.5f There Is Little Scientific Evidence for Extrasensory Perception 200

*Psychological Applications: Can You Improve Your Memory and Self-Esteem Through Subliminal Persuasion?—203*

## Chapter 5

### *Consciousness* 209

#### 5.1 The Nature of Consciousness 210

- 5.1a Consciousness Is Subjective, Selective, Divided, Continuous, Changing, and Consists of Many Levels 210
- 5.1b Consciousness May Provide Us with Survival Advantages 214

## 5.2 Sleep 215

- 5.2a Daily Body Rhythms Regulate Our Activities 215
- 5.2b There Are Distinct Stages of Sleep 218
- 5.2c Sleep Habits Vary Individually, Culturally, and Historically 222
- 5.2d Dreaming Often Occurs During REM Sleep 224
- 5.2e No Consensus Exists on the Cause or Meaning of Dreams 226

## 5.3 Other Altered States of Consciousness 231

- 5.3a Hypnosis Has Been Practiced for Thousands of Years 231
- 5.3b Some Psychologists Doubt That Hypnosis Is an Altered State 233
- 5.3c Meditation Provides Relaxation and Reduces Arousal 234
- 5.3d Psychoactive Drug Use Can Lead to Dependence 235
- 5.3e Depressants Slow Bodily Functions and Induce Relaxation 236
- 5.3f Stimulants Speed Up Bodily Functions 240
- 5.3g Hallucinogens Induce Profoundly Altered States 243
- 5.3h Biological and Sociocultural Factors Influence Drug Use 245

*Psychological Applications: How Can You Deal with Sleep Disorders?—248*

# Chapter 6

## Learning 255

### 6.1 Classical Conditioning 256

- 6.1a Pavlov Stumbled upon Classical Conditioning 257
- 6.1b Classical Conditioning Helps Animals Learn to Predict Events 260
- 6.1c Other Stimuli Can Produce the Conditioned Response 263
- 6.1d Animals Differ in What Responses Can Be Classically Conditioned 266

### 6.2 Operant

#### Conditioning 270

- 6.2a Operant Behavior Is Controlled by Consequences 270
- 6.2b A Reinforcer Increases the Probability of Behavior 271
- 6.2c Punishment Decreases the Probability of Behavior 273
- 6.2d Different Reinforcement Schedules Lead to Different Learning 274
- 6.2e Accidental Reinforcement Can Cause Superstitious Behavior 277
- 6.2f Shaping Reinforces Closer Approximations to Desired Behavior 278
- 6.2g Operant Conditioning Theory Overlooks Genetic and Cognitive Influences 280

### 6.3 Observational Learning 283

- 6.3a Learning Often Occurs by Observing Others' Behavior 283
- 6.3b Mirror Neurons Play a Role in Observational Learning 284
- 6.3c We Often Learn Aggressive Behavior Through Observation 285
- 6.3d Positive Social Modeling Weakens the Influence of Aggressive Models 287

*Psychological Applications: Learning How to Exercise Self-Control in Your Academic and Personal Life—289*

# Chapter 7

## Memory 295

### 7.1 The Nature of Memory 297

- 7.1a The Computer's Information Processing System Has Been a Useful Model for Human Memory 297
- 7.1b Sensory Memory Preserves Detailed Sensory Information for a Few Moments 301
- 7.1c Short-Term Memory Is Conceived of as a "Working Memory" System 302

7.1d	There Are Two Types of Memory Rehearsal	305
<b>7.2</b>	<b>What Constitutes Long-Term Memory?</b>	<b>306</b>
7.2a	Long-Term Memories Can Be Explicit or Implicit	307
7.2b	Some Information in Long-Term Memory Is Organized into Networks	310
7.2c	Information in Long-Term Memory Can Be Organized Around Schemas	313
7.2d	Information in Long-Term Memory Is Encoded at Deeper or Shallower Levels	314
7.2e	Memory May Involve Parallel Processing of Neural Units	316
<b>7.3</b>	<b>How Do We Retrieve Information from Memory?</b>	<b>318</b>
7.3a	Memory Retrieval Varies in Difficulty	318
7.3b	Retrieval Cues Help Trigger Recall of Stored Memories	320
7.3c	Source Confusion Can Create Memory Illusions	321
7.3d	Memories Are Often Sketchy Reconstructions of the Past	322
<b>7.4</b>	<b>How Does Forgetting Occur?</b>	<b>325</b>
7.4a	Most Forgetting Occurs Soon after Learning	325
7.4b	Forgetting Often Occurs Due to Interference	326
7.4c	Absentmindedness Is a Common Cause of Forgetting	327
7.4d	We Are Sometimes Motivated to Forget	328
<b>7.5</b>	<b>What Is the Biological Basis for Memories?</b>	<b>330</b>
7.5a	Long-Term Potentiation May Be the Neural Basis for Memory	331
7.5b	Several Brain Regions Are Involved in Memory Formation and Storage	332
<i>Psychological Applications: Improving Everyday Memory—334</i>

## Chapter 8

### *Language, Thinking, and Intelligence* 341

#### 8.1 Language 342

- 8.1a Language Evolution Had Social and Cognitive Advantages 343
- 8.1b Language Capabilities May Not Be Unique to Humans 345
- 8.1c Infants Appear to Be Born Prepared to Learn Language 346
- 8.1d Language Development Occurs in Distinct Stages 348
- 8.1e Language Can Influence Thought 350

#### 8.2 Thinking 353

- 8.2a Concept Formation Is a Basic Element of Cognition 353
- 8.2b We Employ a Number of Problem-Solving Strategies 354
- 8.2c Internal Obstacles Can Impede Problem-Solving 356
- 8.2d Decision-Making Heuristics Often Sidetrack Everyday Cognition 360

#### 8.3 Intelligence and Intelligence Testing 364

- 8.3a Early Intelligence Testing Was Shaped by Racial and Cultural Stereotypes 364
- 8.3b Modern Tests of Mental Abilities Measure Either Aptitude or Achievement 365
- 8.3c Psychological Tests Must Be Standardized, Reliable, and Valid 368
- 8.3d Intelligence Encompasses Either a General Ability or Several Distinct Abilities 373

#### 8.4 Neurological, Hereditary, and Environmental Influences on Intelligence 380

- 8.4a People Appear to Differ in Their Neural Complexity, Quickness, and Efficiency 380
- 8.4b Twin and Adoption Studies Indicate That Both Genes and Environment Influence Intelligence 383

- 8.4c There Are Group Differences in IQ Scores 386
- 8.4d Cultural and Social Psychological Factors May Explain Group IQ Differences 389
- 8.4e Intellectual Ability Is Shaped by Self-Fulfilling Prophecies 393

*Psychological Applications: How Can You “Create” a Creative Environment?—396*

## Chapter 9

### *Motivation* 405

#### 9.1 The Motivational Process 406

- 9.1a Motivation Is a Dynamic Process 406
- 9.1b Genes May Shape Our Motivation 407
- 9.1c We Are Sometimes Motivated to Reduce Arousal 407
- 9.1d We Are Sometimes Motivated to Maintain an Optimal Level of Arousal 409
- 9.1e Incentive Theory Examines How External Factors Motivate Behavior 409
- 9.1f Maslow Proposed That Needs Are Organized in a Hierarchy 412

#### 9.2 Hunger and Eating 414

- 9.2a Various Biological Mechanisms Control Hunger and Eating 414
- 9.2b Our Environment Also Controls Hunger and Eating 415
- 9.2c The Body May Be “Set” to Maintain Weight Within a Limited Range 417
- 9.2d Obesity Causes Numerous Health Problems 418
- 9.2e Cultural Thinness Standards Are Related to a Host of Social Problems 420

#### 9.3 Sexual Motivation 424

- 9.3a Men Desire More Sexual Behaviors Than Do Women 425
- 9.3b Sex and Love May Be More Fused for Women Than for Men 430

- 9.3c The Sexual Response Cycle Is Very Similar in Men and Women 431
- 9.3d Sexual Orientation Is a Continuum 432
- 9.3e Biology Plays a Substantial Role in Determining Sexual Orientation 436

#### 9.4 Belongingness and Achievement Motivation 438

- 9.4a People Differ in Their Need to Seek the Company of Others 438
- 9.4b Individuals Differ in Their Need for Achievement 440
- 9.4c Certain Strategies Can Increase Achievement Motivation 442

## Chapter 10

### *Personality* 449

#### 10.1 The Nature of Personality 451

- 10.1a Consistency and Distinctiveness Define Personality 451
- 10.1b Culture and Evolutionary Processes Shape Personality 452

#### 10.2 The Psychoanalytic Perspective 453

- 10.2a Psychoanalytic Theory Asserts That the Unconscious Controls Behavior 454
- 10.2b Freud Divided Personality into the Id, the Ego, and the Superego 455
- 10.2c Personality Development Occurs in Psychosexual Stages 456
- 10.2d Defense Mechanisms Reduce or Redirect Unconsciously Caused Anxiety 459
- 10.2e There Are Many Variations of Psychoanalytic Theory 460

#### 10.3 The Humanistic Perspective 464

- 10.3a Rogers’s Person-Centered Theory Emphasizes Self-Realization 464
- 10.3b Maslow’s Self-Actualization Theory Stresses Maximizing Potential 465

- 10.3c The Humanistic Perspective Has Been Criticized as Being Overly Optimistic 466

#### 10.4 The Trait

##### Perspective 466

- 10.4a Trait Theories Describe Basic Personality Dimensions 467
- 10.4b Factor Analysis Is Used to Identify Personality Traits 468
- 10.4c The Five-Factor Model Specifies Five Basic Personality Traits 470
- 10.4d Positive Psychologists Identify Personality Traits That Are Character Strengths 474
- 10.4e Critics Challenge Whether Traits Reliably Predict Behavior 476

#### 10.5 The Social Cognitive Perspective 478

- 10.5a Personality Is Shaped by Interactions among People's Cognitions, Behavior, and Environment 479
- 10.5b Life Experiences Foster Beliefs about Either Control or Helplessness 480
- 10.5c Social Cognitive Psychologists Have Extensively Studied the Self 481
- 10.5d The Social Cognitive Perspective Has Difficulty Explaining Nonrational Behavior 482

#### 10.6 Measuring Personality 484

- 10.6a Projective Tests Measure Unconscious Motives 484
- 10.6b Objective Tests Measure Conscious Thoughts, Feelings, and Behavior 486

#### 10.7 Neurological and Genetic Determinants of Personality 488

- 10.7a Personality Is Shaped by Nervous System Arousal and Specific Brain Activity 489
- 10.7b Both Genetic and Environmental Factors Shape Personality 491

*Psychological Applications: Do You Have a Chameleon-Like Personality?—492*

## Chapter 11

### *Psychological Disorders* 499

#### 11.1 How Should We Define and Explain Psychological Disorders? 501

- 11.1a The Medical Model Proposes That Psychological Disorders Are Like Diseases 501
- 11.1b Psychological Disorders Involve Atypical Behavior That Causes Personal Distress or Social Impairment 502
- 11.1c Psychologists Rely on Different Theories to Explain Mental Illness 504
- 11.1d Using Diagnostic Labels Has Both Risks and Benefits 507

#### 11.2 The Major Classes of Disorders Identified by the DSM-5 509

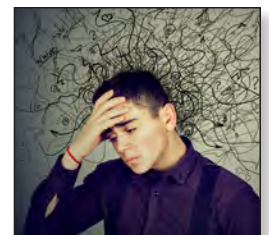

- 11.2a Anxiety Disorders Are Characterized by Distressing, Persistent Anxiety 510
- 11.2b Obsessive-Compulsive and Related Disorders Involve Distressing Thoughts and Strong Urges 514
- 11.2c Trauma- and Stressor-Related Disorders Involve Difficulties Caused by Adverse Life Events 516
- 11.2d Dissociative Disorders Involve a Loss of Contact with Portions of One's Consciousness or Memory 518
- 11.2e Depressive and Bipolar Disorders Are Characterized by Emotional Extremes 521
- 11.2f Schizophrenia Involves Disturbances in Almost All Areas of Psychological Functioning 529
- 11.2g Personality Disorders Involve Significant Impairments in Personality Functioning 533

*Psychological Applications:

## Chapter 12

### *Therapy* 543

#### 12.1 Who Offers Therapies for Psychological Disorders? 544

- 12.1a There Are Both Psychological and Biomedical Therapies 544
- 12.1b Three Primary Mental Health Professions Provide Therapy 545
- 12.1c Most Therapy Is Offered Through a Managed Care System 545

#### 12.2 Psychodynamic Therapies 546

- 12.2a Psychoanalysis Laid the Groundwork for Psychodynamic Therapies 546
- 12.2b Free Association Is the Primary Psychodynamic Technique 547
- 12.2c Psychodynamic Therapy Is Lengthy and Expensive 548

#### 12.3 Behavior Therapies 549

- 12.3a Some Behavior Therapies Rely upon Classical Conditioning 549
- 12.3b Operant Conditioning Is Used in Token Economies 552
- 12.3c Observational Learning Is Used in Modeling and Social Skills Training 552

#### 12.4 Cognitive Therapies 554

- 12.4a Rational-Emotive Behavior Therapy Confronts Clients' Irrational Assumptions 554
- 12.4b Cognitive-Behavior Therapy Focuses on Emotional Problems 555
- 12.4c Acceptance and Commitment Therapy Focuses on Accepting Life's Difficulties 556

#### 12.5 Humanistic Therapies 557

- 12.5a Client-Centered Therapy Focuses on Clients' Conscious Self-Perceptions 557
- 12.5b Gestalt Therapy Encourages Clients to Get in Touch with Their Feelings 559

#### 12.6 Other Forms of Psychotherapy 560

- 12.6a Child Therapies Use Techniques Designed for Younger Minds 561
- 12.6b Group Therapy Involves Clients Discussing, Collectively, Their Problems with a Therapist 561

- 12.6c Family and Couples Therapies Try to Change Dysfunctional Interaction Patterns 562
- 12.6d The COVID-19 Pandemic Dramatically Increased Online Therapy 563

#### 12.7 Biomedical Therapies 564

- 12.7a Antipsychotic Drugs Affect Dopamine Neurotransmitters 564
- 12.7b Antidepressant Drugs Affect Serotonin and Norepinephrine Neurotransmitters 565
- 12.7c Antianxiety Drugs Are the Most Widely Used Legal Drugs 566
- 12.7d Electroconvulsive Therapy Is Sometimes Used to Treat Depression 567
- 12.7e Psychosurgery Removes Portions of the Brain 568
- 12.7f Electrodes Implanted in the Brain Provide Deep Brain Stimulation 568

*Psychological Applications: How Do You Select a Psychotherapist?*—570

## Chapter 13

### *Emotion, Stress, and Health* 577

#### 13.1 Emotion 578

- 13.1a Emotions Facilitate Survival 578
- 13.1b Emotions Result in Bodily Responses 581
- 13.1c Two Theories Dispute Whether Physiological Responses Precede Emotions 581
- 13.1d Specific Brain Regions Coordinate Emotional Responses 585
- 13.1e The Two-Factor Theory Emphasizes the Role of Cognition in Emotions 588

### 13.2 What Causes and What Moderates Stress? 591

- 13.2a Stressors Can Be Positive or Negative, as Well as Large or Small 592
- 13.2b Minority Groups Experience Stressors Due to Societal Discrimination 595
- 13.2c Selye Viewed Stress as a Specific Set of Responses to Demands 595
- 13.2d “Fight or Flight” Is Not the Only Stress Response 598
- 13.2e Psychophysiological Illnesses Are Stress Related 600
- 13.2f Cognitive Appraisal Is an Important Part of the Stress Response 603
- 13.2g Predictability and Control Can Moderate the Stress Response 605
- 13.2h Hostile and Pessimistic People Are Very Reactive to Stressors 607

### 13.3 What Promotes Health and Happiness? 611

- 13.3a Aerobic Exercise Can Increase Both Physical and Mental Health 611
- 13.3b Relaxation Training Is Effective in Reducing Stress and Improving Health 612
- 13.3c Social Support Has Therapeutic Effects 614
- 13.3d Religion and Spirituality Can Positively Influence Health and Longevity 616
- 13.3e Genetics and Culture Both Influence Happiness 618

## Chapter 14

### *Understanding Social Behavior* 629

#### 14.1 Attitudes and Persuasion 630

- 14.1a Repeated Exposure and Conditioning Shape Attitudes 630

- 14.1b People Take One of Two Cognitive Persuasion Routes 631
- 14.1c Cognitive Dissonance Can Motivate Attitude Change 632

#### 14.2 Stereotypes, Prejudice, and Discrimination 635

- 14.2a Categorizing People into Groups Can Lead to Stereotyping 635
- 14.2b Negative Racial Stereotypes Can Quickly Trigger Deadly Actions 636
- 14.2c Sexist Beliefs Foster and Maintain Gender Inequality 639
- 14.2d Intergroup Competition Can Cause Prejudice 640
- 14.2e Many People Are Unaware of Their Own Prejudice 642
- 14.2f Prejudice Is a Habit That Can Be Broken 642

#### 14.3 Social Influence 644

- 14.3a Asch’s Research Demonstrates the Power of Conformity Pressure 644
- 14.3b Compliance Involves Gentle Social Influence 646
- 14.3c Milgram Discovered That Destructive Obedience Is Common 647
- 14.3d Later Studies Replicated Milgram’s Findings 650

#### 14.4 Hurting and Helping Others 652

- 14.4a There Are Gender Differences in Styles of Aggression 652
- 14.4b Aggressive Impulses Can Be Modified by Higher-Order Thinking 654
- 14.4c Helping Others Is Largely a Learned Response 657
- 14.4d Deciding to Help Often Involves a Series of Decisions 658
- 14.4e Being Helpful Can Benefit Your Own Well-Being 661

**14.5 Interpersonal Attraction and Love** 662

- 14.5a Proximity and Similarity Often Lead to Attraction 662
- 14.5b Romantic Love Consists of Both Passionate and Companionate Love 663
- 14.5c Being Playful and Expressing Gratitude Fosters Relationship Satisfaction 665
