

Preface

New to This Edition

The combined version of *Introduction to American History* has undergone a number of revisions and been updated to 2022 in an effort to create a more comprehensive and readable text for students. The content within a number of chapters has been rearranged so that discussions of culture follow discussions of major events, rather than vice versa and some redundancy has been eliminated. The discussion of Puritans and Puritanism has been altered and rearranged and the histories of American women and ethnic minorities have been expanded. New key terms match the style of the previous edition; they are in bold in the body text so that they are easier to find, and definitions of the key terms appear on the outside margins of the pages. Bibliographies have been updated with new sources so that readers know where the material is coming from and where to go for further reading.

New information has been added throughout the text and many of the maps have been redesigned and captioned to make them easier to read and understand. Additional information has been added on various military maneuvers, including the Battles of Horseshoe Bend and New Orleans. The brief biography of Abraham Lincoln, his reelection, and assassination are now covered in the chapter on the Civil War rather than chapter on Reconstruction. Discussions of the black American experience, Asian American experience, and Hispanic American experience throughout American history have been expanded. Cuban immigration and the Cuban American experience have been added, including Cuban cigar manufacturing. The Civil War soldier experiences of these ethnic groups have been expanded.

The discussions of culture in the Gilded Age, Jazz Age, and cold war eras now follow the discussion of major events and international politics in these epochs. Similarly, the culture shift that occurred between 1963 and 1980 now follows the discussion of politics and events for the time period. New information covers Mexican immigration and Hispanic American experiences; expanded coverage of segregation and violence against black Americans; expanded coverage of the Asian American experience; and the roles of Asian Americans, African Americans, and Hispanic Americans during America's wars since the Civil War. The long African American struggle for Civil Rights is covered in greater detail as is the labor movement among California's Hispanic agricultural workers. The second term of the Obama administration has been added along with discussions of social unrest and gun violence in the twenty-first century, including the Black Lives Matter movement, and the conservative countermovements. An entire chapter is dedicated to the election of President Donald Trump, the events that occurred during his administration, and his defeat in the 2020 election followed by his contesting of the election results, culminating with the Capitol riot on January 6, 2021. Discussions of the rise of social media as a spreader of both information and misinformation are included in the context of the 2020 election and social unrest, including violence against black people by police, the death of George Floyd, and the contention of Trump and his supporters that the 2020 election was stolen. Foreign policy during Obama's second term and Trump's presidency are discussed, including tension between Russia and Ukraine.

The final result is a more readable and understandable text that better meets the needs of students in the twenty-first century.
