REVIEWERS	XXII

PART 1: THE BASICS

CHAPTER 1

GENERAL PHARMACOLOGIC PRINCIPLES	3
Basic Terms	4
Drug Development	5
Herbal Supplements (Neutraceuticals)	6
Drug Information Sources	7
Interpreting Drug Information	7
Drug Names	8
Clinical Pharmacology	9
Indications and Usage	9
Contraindications	10
Drug Interactions	11
Adverse Drug Reactions	12
Dosage and Administration	15
Routes of Administration	15
Enteral Routes	17
Parenteral Routes	17
Other Routes	17
Pharmacokinetics	19
Absorption	19
Distribution	21
Metabolism	22
Elimination	23

Pharmacodynamics	24
Selectivity	24
Lock-and-Key Receptor Theory	25
Racemic Mixtures	26
Agonists Versus Antagonists	26
Potency	26
Tolerance	28
Half-Life	28
Poisonings/Toxicity	29
Pharmacogenomics	30
Prescription Orders	30
Commonsense Rules	32

SUMMARY 33

REVIEW QUESTIONS 33

CHAPTER 2:

THE METRIC SYSTEM AND DRUG DOSAGE CALCULATIONS 35

Exponential Powers of 10	36
Exponents	36
Systems of Measurement	38
United States Customary System	38
The Metric System	38
Example Calculation 1	39
Example Calculation 2	39
Conversion of Units	40

Example Calculation 3	41	Aerosol Size Matters	77
Example Calculation 4	42	Breathing Pattern	78
Factor-Label Method to Convert Between Systems	42	Types of Aerosolized Drugs	79
Example Calculation 5	42	Aerosol Delivery Devices	80
Example Calculation 6	42	Metered-Dose Inhaler	80
Drug Dosage Calculations	43	Small-Volume Nebulizer	84
Solutions	43	Newer Nebulizer Designs	84
Percentage Solutions	44	Continuous Bronchodilator Therapy	86
Setting Up Proportions	44	Dry-Powder Inhaler	86
Example Calculation 7	45	Choosing the Appropriate Delivery Device	87
Example Calculation 8	45	Aerosol Delivery in Intubated Patients	88
Example Calculation 9	46	The Future	90
Ratio Solutions	46	SUMMARY	91
Drug Orders in Drops	47	REVIEW QUESTIONS	91
SUMMARY	48		
REVIEW QUESTIONS	48		
CHAPTER 3		PART 2: THE SPECIFIC DRUG CATEGORIES	
PHARMACOLOGY OF THE AUTONOMIC NERVOUS SYSTEM	51	CHAPTER 5	
Nervous System Divisions	52	BRONCHODILATORS	95
PNS Divisions	53	Airway Anatomy and Physiology	96
Nervous System Conduction	57	Bronchoconstriction Versus Bronchospasm	97
Types and Location of Neurotransmitters	57	Neurologic Control of Bronchial Smooth Muscle	99
Receptors	59	Sympathetic Nervous System	99
Receptor Classification	61	Parasympathetic Nervous System	99
ANS Drug Terminology	62	Chemical Mediators of Neural Transmission	100
Direct- and Indirect-Acting Agents	64	Sympathetic Nervous System Receptors	101
Parasympathomimetics	64	The Sympathetic Nervous System in the Lung	102
Parasympatholytics	65	Bronchodilators	103
Sympathomimetics	66	Sympathomimetic (Adrenergic) Bronchodilators	104
Sympatholytics	69	Mechanism of Action	104
SUMMARY	70	Development of the β-Agonists	105
REVIEW QUESTIONS	70	Catecholamines	106
CHAPTER 4		Resorcinols	107
MEDICATED AEROSOL TREATMENTS	73	Saligenins	108
Basic Concepts of Medicated Aerosols	74	Side Effects of β -Agonists	110
What Is Aerosol Therapy?	74	Classification by Duration of Action	112
Advantages and Disadvantages	75		
Technical Background	76		

Anticholinergic (Parasympatholytic)	
Bronchodilators	115
Mechanism of Action	115
Atropine Sulfate	117
Ipratropium Bromide (Atrovent®)	117
Tiotropium Bromide (Spiriva®)	119
Monitoring Outcomes of Inhaled	
Bronchodilator Therapy	120
Methylxanthines	121
Mechanism of Action	121
Nonbronchodilating Effects of	
Theophylline	122

SUMMARY	123
REVIEW QUESTIONS	123

CHAPTER 6

MUCOKINETICS AND SURFACTANTS	127
The Mucociliary System	128
Anatomy and Physiology	128
Structure and Composition of Mucus	129
Bland Aerosols	132
Definitions	132
Delivery Methods	133
Bland Solutions	135
Mucolytics	137
Definition	137
Expectorants	139
Antitussives/Cough Suppressants	140
Conclusion	141
Surface-Active Agents	141
Alveolar Physiology and Surfactant	
Synthesis	141
Surfactant Function	143
Indications for Surfactant Replacement	
Therapy	145
Types of Exogenous Surfactants	146
Therapeutic Approaches	146
Representative Drugs	147
General Techniques of Surfactant	
Administration	147
Adverse Reactions	148
Surfactant Administration in Adult	
Patients	150

SUMMARY	151
REVIEW QUESTIONS	151

CHAPTER 7

ANTI-INFLAMMATORY AND	
ANTIASTHMATIC AGENTS	155
The Inflammatory Process	156
The Immune Response	156
Mast Cell Chemical Mediator Release	157
Types of Asthma	159
Phases of the Inflammatory Response	159
Corticosteroids	161
Corticosteroid Physiology	161
Hypothalamic Pituitary Adrenal Axis	162
Corticosteroid Mechanism of Action	164
Corticosteroid Use in Airway	
Remodeling	164
Adverse Effects of Corticosteroids	165
Oral and Parenteral Corticosteroid	
Administration	166
Inhaled Corticosteroids	166
Benefits of Daily Corticosteroid Use	168
Steroid Dependency	170
Antiasthmatics	170
Cromolyn and Nedocromil Sodium	170
Dosage Forms	171
Side Effects	171
Prostaglandins	171
Physiology	171
Leukotriene Modifiers	172
Physiology	172
Treating Upper-Airway Congestion	173
Allergic Rhinitis	173
Intranasal Medications	174
Antihistamines	175
Decongestants	178

SUMMARY	179
REVIEW QUESTIONS	179

CHAPTER 8

ANTIMICROBIAL AGENTS	181
General Principles Of	
Anti-Infective Therapy	182
Terminology	182
The Infection Process	183
Empiric Therapy	183
Classification of Bacteria	184

Identification of Pathogenic Organisms	184
Mechanisms of Resistance	188
Monitoring Anti-Infective Therapy	189
Classification of	
Antibacterial Agents	190
Bacteriostatic Versus Bactericidal	190
Broad-Spectrum Versus Narrow-Spectrum	190
Based on Mechanism of Action	190
Antibacterial Agents	191
Antivirals	198
Antivirals to Treat Herpes	199
Antivirals to Treat Respiratory Syncytial Virus	199
Antivirals to Treat Acquired Immunodeficiency Syndrome (AIDS)	200
Antifungals	201
SUMMARY	203
REVIEW QUESTIONS	203

CHAPTER 9

CARDIAC AGENTS 205

Cardiovascular Overview	207
Basic Terminology	207
Cardiac Circulation	207
Cardiac Conduction	208
Ion Influence	209
The ECG Tracing	211
Arrhythmias	212
Sites of Arrhythmias	213
Antiarrhythmic Agents	213
Therapeutic Goals	213
Mechanism of Action	213
Classification of Antiarrhythmic Drugs	213
Heart Failure	215
Pathophysiology	215
Drugs to Treat Heart Failure	216
Digoxin for Heart Failure	216
ACE Inhibitors for Heart Failure	217
ARBs for Heart Failure	218
β -Antagonists for Heart Failure	218
Vasodilators for Heart Failure	218
Diuretics for Heart Failure	219
Aldosterone Antagonists for Heart Failure	220

Intravenous Inotropes for Heart Failure	220
Dopamine for Heart Failure	220
Nitroprusside for Heart Failure	220
Nitroglycerin for Heart Failure	221
Nesiritide for Heart Failure	221
Management of Shock	221
Angina	221
Pathophysiology of Angina	221
Pharmacologic Treatment of Angina	222
β -Blockers as Antianginals	223
Calcium-Channel Blockers as Antianginals	223
Nitroglycerin as an Antianginal	224
Ranolazine	225
Acute Coronary Syndromes	225
Myocardial Infarction	225
Diabetes Mellitus	225
Classes of Diabetes Drugs	226
Lipid-Lowering Agents	227

SUMMARY 228

REVIEW QUESTIONS 228

CHAPTER 10

BLOOD PRESSURE AND

ANTITHROMBOTIC AGENTS 231

Blood Pressure	232
The Basics	232
The Blood Vessels	233
Regulation of Blood Pressure	234
Hypertension	235
Categories of Drugs to Treat Hypertension	237
Direct-Acting α_2 -Agonists or Central-Acting Sympatholytics	238
α_1 -Blockers or Peripheral-Acting Sympatholytics	238
β -Blockers	238
Diuretics	239
Angiotensin-Converting Enzyme (ACE) Inhibitors	242
Angiotensin II–Receptor Blockers (ARBs)	243
Calcium-Channel Blockers	243
Vasodilators	244

- Agents for Hypertensive Emergencies/
Urgencies 245
- Treating Hypotension 247
- The Hemostatic System 247**
 - The Clotting Process 247
 - Anticoagulants 248
 - Direct Thrombin Inhibitors 252
 - Antiplatelet Drugs 253
 - Platelet Glycoprotein IIB/IIIA–Receptor
Inhibitors 254
 - Fibrinolytics 254

SUMMARY 256**REVIEW QUESTIONS 256****CHAPTER 11**
**NEUROMUSCULAR,
SEDATIVE, ANESTHETIC, AND
ANALGESIC AGENTS 259**

- Nerve Transmission 261
 - Physiology of Muscle Contraction 261
 - Acetylcholinesterase 262
 - Neuromuscular Blocking Agents 262
 - Nondepolarizing Agents 263
 - Depolarizing Agents 263
 - NMBA Selection Factors 264
- Skeletal Muscle Relaxants 267
- Sedatives, Hypnotics, and
Anxiolytics 268
 - Terminology 268
 - Benzodiazepines 268
 - α_2 -Adrenergic Agonist (Sedative) 269
 - Nonbenzodiazepines 269
 - Barbiturates 269
 - Cocktails 270
- Anesthetics 270
 - General Versus Local 270
 - General Anesthesia 270
 - Stages of Anesthesia 271
 - Specific General Anesthetics 271
 - Local Anesthetics 273
 - Postoperative Nausea and Vomiting 274
- Ventilatory Stimulants 275
- Analgesia 276
 - Principles of Analgesia 276
 - The Pain Response 277

- Analgesics 278
- Outcomes Assessment Analgesic
Therapy 278
- Pain-Related Terminology 278
- Classes of Analgesics 279
- Opioids 279
- Opioid Antagonists 281
- Steroid Anti-Inflammatory Agents 282
- Nonsteroidal Anti-Inflammatory
Agents 283
- Analgesic Synergy 284
- Adjuncts to Analgesics 285

SUMMARY 286**REVIEW QUESTIONS 286****CHAPTER 12**
**THERAPEUTIC
MEDICAL GASES 289**

- Oxygen Therapy 290
 - Physiologic Background 290
 - Hypoxemia 291
 - Clinical Manifestations of Hypoxemia 293
 - Hypoxia 293
 - Goals of Oxygen Therapy 294
 - Oxygen Administration Devices 295
 - Monitoring Oxygen Therapy 300
 - Hazards of Oxygen Therapy 301
- Helium Therapy 303
 - Indications for Helium Therapy 303
 - Administration of Helium/Oxygen 303
 - Hazard of Helium/Oxygen Therapy 303
- Nitric Oxide Therapy 304
 - Physiology of Nitric Oxide 304
 - INO Administration and Dosage 305
 - Therapeutic Indications for Inhalation
of Nitric Oxide 305
 - Monitoring Nitric Oxide Therapy 305

SUMMARY 306**REVIEW QUESTIONS 306**

PART 3: PUTTING IT ALL TOGETHER

CHAPTER 13

PHARMACOLOGIC MANAGEMENT OF OBSTRUCTIVE PULMONARY DISEASE: ASTHMA, CHRONIC BRONCHITIS, AND EMPHYSEMA 311

- Asthma 313
 - Background 313
 - Differential Diagnosis 314
 - Asthma Symptoms 315
 - Asthma Treatment Goals 317
 - Classification of Asthma Severity 318
 - Asthma Medications 319
 - Asthma Management 320
 - Management of Acute Asthma Exacerbations 324
- COPD 327
 - Background 327
 - Etiology 327
 - Prevention: The Key to Treatment of COPD 330
 - COPD Treatment Goals 334
 - Assessment of COPD 334
 - Drugs Used to Treat COPD 335
 - Step-by-Step Approach 339

SUMMARY 341

REVIEW QUESTIONS 341

CHAPTER 14

PHARMACOLOGIC TREATMENT OF RESPIRATORY INFECTIOUS DISEASE 343

- Developing a Therapeutic Plan for Respiratory Infectious Diseases 345
 - Empiric Treatment 345
 - Local Resistance Patterns (the Antibiogram) 346
 - Individualizing Therapy 347
- Upper-Airway Infectious Diseases 349
 - Otitis Media 349
 - Sinusitis 352
 - Pharyngitis 355

Other Upper-Airway Infections 357

Epiglottitis 357

Croup 358

Lower Respiratory Tract Infections 359

Acute Bronchitis and Bronchiolitis 359

Pneumonia 361

Tuberculosis 369

Avian Influenza 371

Chemical Terrorism 371

SUMMARY 372

REVIEW QUESTIONS 372

CHAPTER 15

MEDICATIONS FOR ADVANCED CARDIOVASCULAR LIFE SUPPORT 375

Normal Conduction and Arrhythmias 377

Electrophysiology 377

Normal Conduction 378

Acute Myocardial Infarction 379

Bradycardia 380

Tachycardia 380

Ventricular Fibrillation 382

Asystole 382

Pulseless Electrical Activity 383

Pharmacologic Agents for Advanced Life Support 384

Medication Access 384

Categories of ACLS Drugs 384

Medications for Cardiovascular Support 386

Oxygen 386

Epinephrine 386

Vasopressin 387

Norepinephrine 388

Sodium Bicarbonate 388

Positive Inotropic Drugs 389

Digoxin 389

Milrinone 390

Dopamine 390

Dobutamine (Dobutrex®) 391

Antiarrhythmic Drugs 392

Atropine 392

Amiodarone (Cordarone®) 392

Lidocaine	393
Procainamide (Pronestyl®)	394
Magnesium Sulfate	395
Ibutilide (Corvert®)	395
Calcium-Channel Blockers	396
Verapamil (Calan®, Isoptin®)	396
Diltiazem (Cardizem®)	397
Adenosine (Adenocard®)	397
β-Adrenergic Blockers	398
Sotalol (Betapace®)	399
REVIEW QUESTIONS	400
 GLOSSARY	 403
INDEX	411
