Contents

Preface xii

List of Figures xv

List of Tables xvii

Chapter 1

The SAS Environment 1

Overview of the SAS environment 1
Three (3) Windows: Editor, Log, Output 1
Color Coding Text 6
Box 1.1 Student Reaction to the SAS Environment
"Compared to SPSS" by Sara Kennedy 7
Window Options 7
Viewing Line Numbers 7
Adding Comments 8
Parts of a Program 9
Data Step 9
Procedures Step 9
Guided Streaming [Inline] Data Program 10
Key Terms 12
Review 12
Questions 13

Chapter 2

SAS and Statistics 15

Overview of SAS 9.4 and Other Software 15
SAS Software 15
Overview of Social Scientists' Use of Statistics 16
Types of Research Questions 16
Data Management 17

Statistical Techniques Most Used By Social Scientists and Practitioners 18
Box 2.1 Student View of Learning Statistics
"Bad Medicine" by André Patterson 19
Basics of Secondary Data 20
Guided Program Accessing External Data file 20
Box 2.2 Student Views of Learning Statistics
"Armed and Dangerous" by Sara Kennedy, M.A. 22
Key Terms 27
Portfolio Activity 27
Activity #1 27
Activity #2 27
Activity #3 27
Review 27
Questions 28

Chapter 3
Levels of Measurement, Central Tendency, and Basic Coding 31
Explanation of Levels of Measurement 31
Role of Levels of Measurement in Statistical Tests 33
Guided Program with PROC UNIVARIATE and PROC FREQ 34
Box 3.1 Students' Views of NOIR
"I Get It!" by Heidi Wheeler 40
Introduction to Measures of Central Tendency 40
How to Check for Normal Distribution 42
Guided Program to Check Normality with PROC UNIVARIATE Using NORMAL and PLOT options with VAR and HISTOGRAM statements 43
Basic Variable Coding 45
Dummy Variables 49
Guided Program with Dummy Variable Creation, Variable Labels, and Value Labels 50
Key Terms 54
Portfolio Activity 54
Review 55
Questions 55

Chapter 4
Types of Data Sets 59
Introduction 59
Temporary Data Sets 60
Guided Program Creating a Temporary Data Set 60
Permanent Data Set 61
Box 4.1 Student Views
"How am I going to Remember All of This?" by Heidi Wheeler 61
Guided Program Creating a Permanent Data Set 62
Guided Program Accessing a Previously Created Permanent Data Set 64
List Input [streaming in-line] 64
Comma-delimited 64
With Columns 65
Reading-in Data from Data Files 66
Infile 66
Key Terms 68
Portfolio Activity 68
Review 69
Questions 69

Chapter 5
Get to Know the Data 73
Introduction 73
How Social Scientists and Practitioners use Means 73
Understanding Means 78
The Link between the Survey and the Codebook 78
Guided Program with PROC MEANS 82
Interpreting and Reporting Means 91
Interpreting and Reporting the Means in the Text 92
Reporting Means in Tables 93
Key Terms 96
Portfolio Assignment 96
Questions 97

Review 99

Chapter 6
Missing Values in Data Sets 101

Importance of Handling Missing Data 101
Handling Missing Values 102
Missing Values in List Input Data 108
Missing Values with Infile 114
Key Terms 119
Portfolio Activity 119
Activity #1 119
Activity #2 119
Questions 119
Review 122

Chapter 7
Data Visualization 123

Univariate Analysis 123
Categorical Variables 123
View and Interpret Data 124
Bar Charts 124
By Subgroups 132
Two-Way Frequency Tables 133
Continuous Variables 136
Histograms and QQ Plots 137
Stem-and-Leaf Box Plot 142
Boxplot 144
Plots 145
Program with Guided Interpretation of PROC PLOT-SCATTER PLOT by Statement 147
Scale Creation and Cronbach's Alpha 149
Handling Missing Data 152
Key Terms 153
Portfolio Assignment 154

Review 154

Questions 155

Chapter 8

Foundations of Inferential Statistics 157

Normal Distributions 157
- *Introduction* 157
- *Program with Guided Interpretation* 158
- *Normal Random Variables* 163
- *Standard Normal Distribution* 165
- *Application of the Standard Normal Distribution* 167

Sampling Distributions 168
- *Introduction* 168
- *Sampling Distributions* 169
- *Properties of the Sampling Distribution and the Central Limit Theorem* 172
- *Use of the Sampling Distribution* 172

Introduction to Hypothesis Testing 174
- *Descriptive Statistics versus Inferential Statistics* 174
- *The Null and Alternative Hypotheses* 175
- *Directional and Non-Directional Hypotheses* 176
- *Two Possible Decisions When Conducting a Hypothesis Test* 178
- *Type I and Type II Errors* 179

One Sample Hypothesis Testing for Means (σ Known) 180
- *Two-Tailed Tests for Means* 180
- *Steps to Hypothesis Testing* 181
- *One Tailed Tests for Means* 184
- *Use of P-Values* 185

One Sample Hypothesis Testing for Means (σ Unknown) 188
- *Guided Analysis and Interpretation* 188

Key Terms 191

Portfolio Assignment 191

Review 192

Questions 192

Chapter 9

Bivariate Analysis 195

Introduction 195

T-tests 195

Independent Samples 196

Guided Analysis and Interpretation 197

Assumptions 201

Satterthwaite t-Test When Variances are Unequal 204

Guided Analysis and Interpretation 206

Assumptions 210

ANOVA 211

Introduction 211

Assumptions 214

Guided Analysis and Interpretation 214

Post Hoc Tests 218

Levene's Test 223

Chi-Square Test of Independence 225

Assumptions 227

Guided Analysis and Interpretation 227

Bar Charts 230

McNemar's Chi-Square Test for Paired Samples 232

Assumptions 233

Guided Analysis and Interpretation 233

Cochran-Mantel-Haenszel Chi-Square Test for Stratified Tables 236

Correlations 242

Guided Analysis and Interpretation 244

Assumptions 247

Phi, Cramer's V, and Kappa 248

Phi (ϕ) 249

Cramer's V 251

Kappa 253

Key Terms 256

Portfolio Assignment 257

Review 257

Questions 257

Chapter 10
Regression Analysis 261

Utility and Application 261
Assumptions 262
The Regression Model 264
Variable Selection 265
Box 10.1 Students' Views of Multivariate Analysis
My First "Real" Project by Sara Kennedy 266
Interpreting Regression Coefficients 266
B versus Beta 267
Collinearity and Variance Inflation Factor (VIF) 267
Box 10.2 Students' Views of Multivariate Analysis
One Student's Secret to Creating Professional Tables by Doris Palmer 268
Guided Analysis and Interpretation 269
Suggested Reading 272
Key Terms 273
Portfolio Activity 273
Exercises 274
Review 274
Questions 274

Appendix A Codebook ISDS 2000 277
Appendix B ISDS 2000 Survey 285
Appendix C Z Table 289
References 293
Index 297
